THE UNIVERSITY OF BRITISH COLUMBIA

**Have you ever struggled with
course enrollment ?**

Business Question:

**How can we use data to assess and improve
UBC's course planning?**

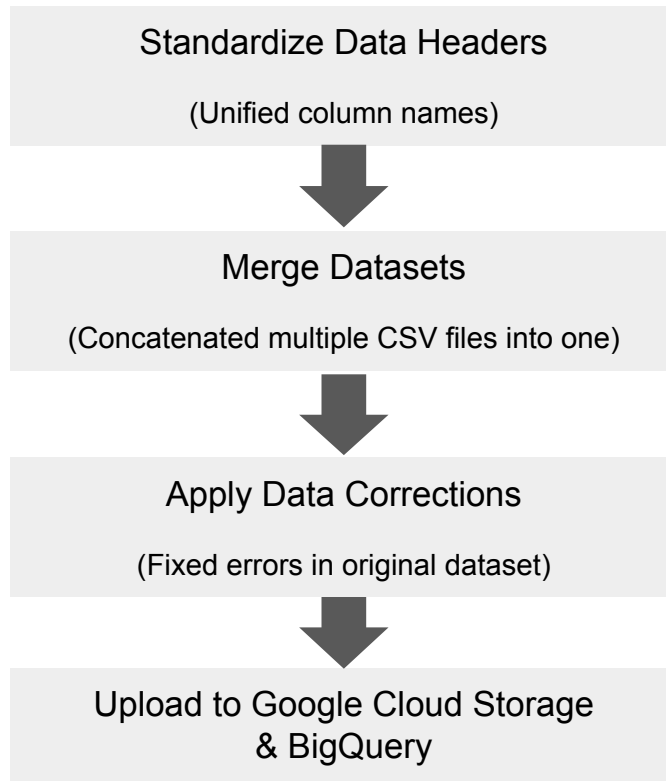

Data Overview

Data Sources: Github Public Data^[1] (10,000 Files, 350,000 rows)

- Covers UBC Vancouver Campus (1996S-2023W)
- **20 Key Features Extracted:**
 - Course Details (Faculty, Year & Session, etc)
 - Course Enrollments
 - Student Grade Distributions (A+, A, A-, B+, etc)
 - Instructor assignments

Final Dataset: ubc_courses_overall.csv

Decrease since 2014

Top 10 Growing Courses with Forecast^[1]

Top 10 Declining Courses with Forecast^[2]

Enrollment Trends

[1] & [2]: Forecast driven by ARIMA PLUS in BigQuery. Seasonality was due to inbalance in UBC's session setting (Winter session covers Sep - Apr while Summer session covers May - Aug).

Correlation Analysis - Method

Step 1: Select Faculty

Focus on **Business faculty** undergraduate courses (100-400 level).

Combine Subject and Course to create a unique course identifier.

Step 2: Top 10 Popular Courses

Rank courses based on **total enrollment (SUM Reported)**.

Select the **top 10 courses**^[1] with the highest student enrollment.

Step 3: Analyze Correlation

Compute **annual average enrollment** for each course.

Standardize enrollment using **Z-score normalization**.

Calculate **Pearson correlation**

When some courses become popular...

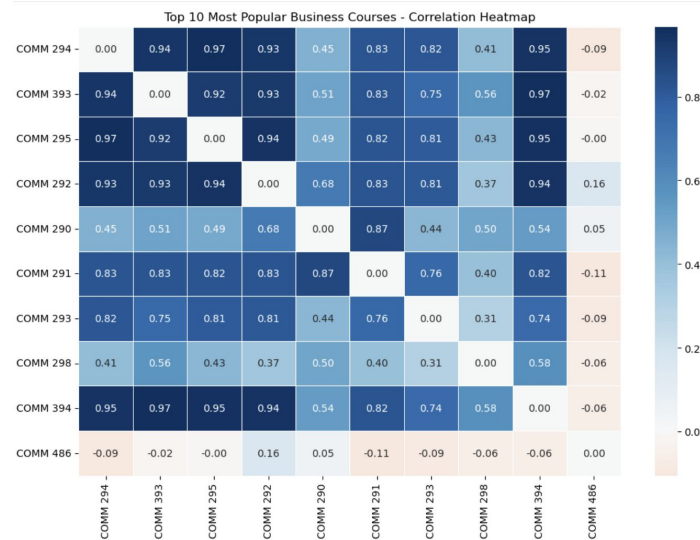

Strong Positive

- If one course becomes more popular, the other is likely to follow.
- UBC should **increase capacity for both courses** rather than just one.
- Consider **co-scheduling or offering course bundles**.

Strong Negative

- Could be due to **scheduling conflicts** or **student specialization choices**.
- Use **"A/B testing"** to check if time conflicts are the cause.
- If not due to scheduling, **overlapping these courses may be efficient**.

Others may change !

Student Performance Analysis-Faculty of Business

4.7 % > 3.9 %

Sauder High Fail Rate Ratio

In Year 2023, 4.7% of all courses in Sauder have a high Fail rate (>10%)

UBC High Fail Rate Ratio

In Year 2023, 3.9% of all courses in UBC have a high Fail Rate (>10%)

Sauder has a Higher High Fail Rate Ratio than University average level!

How can we improve student performance in faculty of business?

Top 10 Fail Rate Courses

Course Title	Fail Rate%
Foundations of Real Estate Mathematics	19.5
British Columbia Real Estate Law and Real Estate	17.81
Foundations of Real Estate Appraisal	16.82
Micro Foundations of Real Estate Economics	16.08
Real Estate Business	14.15
Real Estate Investment Analysis and Advanced Inc.	14
Statistical and Computer Applications in Valuation	11.51
Introductory Management Accounting	11.41
Urban and Real Estate Economics	11.32
Fundamentals of Financial Accounting	10.8

High Fail Rate

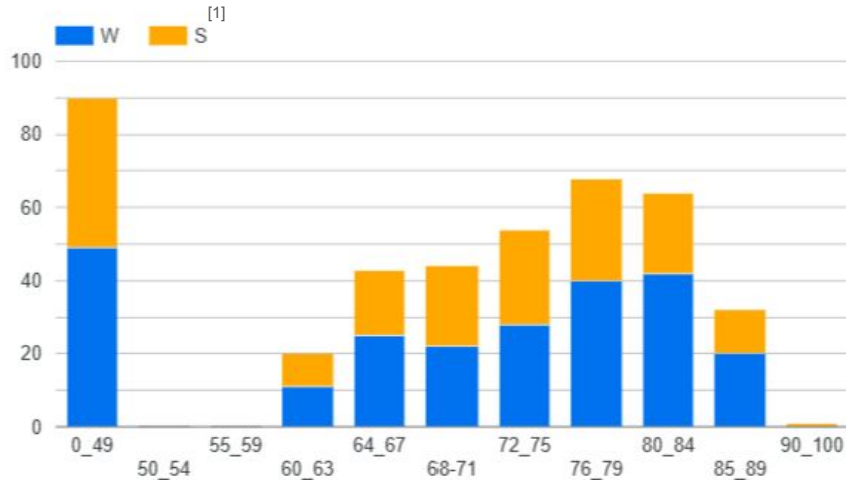

Real Estate

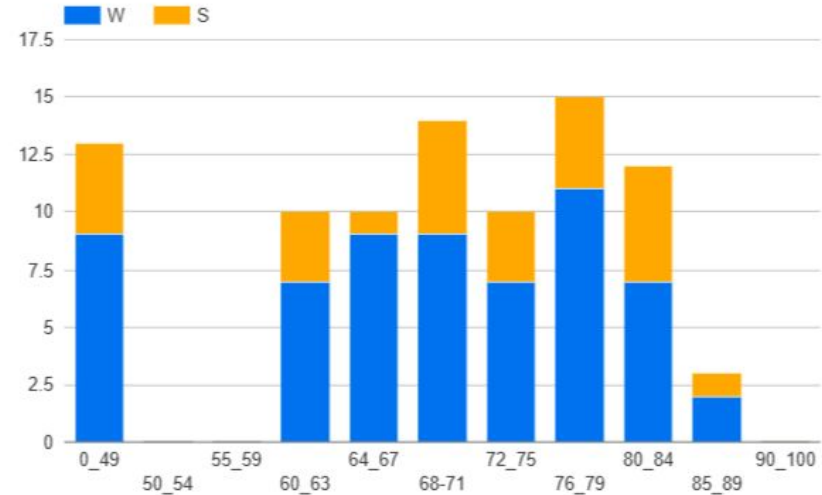

More Details of the Grade Distribution

Foundations of Real Estate Appraisal Grade Distribution Statistical and Computer Applications in Valuation

Fail Rate: 16.8%

High Score Rate: **only 0.24%**

Fail Rate: 15%

High Score Rate: **0%** → **no one gets an A+!**

[1]: W indicates Winter Session (Sep - Apr), S indicates Summer Session (May - Aug).

Course Reviews—What can this indicate?

The course Real Estate Finance in a Canadian Context has a high fail rate: **10%**

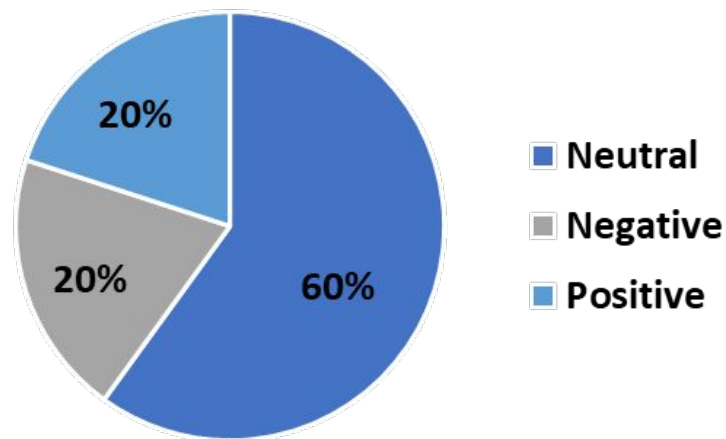

Course Reviews:
Non-positive reviews: 80%!

Courses with high fail rate & non-positive reviews:

What can we do ?

- Extra tutorials
- Additional office hours & TAs
- More academic support

Online Impacts on Enrollment & Performance

High

Potential Explanation:

- Courses rely on digital tools and independent problem-solving
- Lower pressure in online exams
- Recorded lectures can be reviewed

Insights:

- Add online/hybrid options in the future
- Flag potential unmatched difficulty level in course setting when transition to online

Low

Potential Explanation:

- Discussion-heavy, Lab-Based, and Hands-on courses struggled with online mode

Insights:

- Not suitable for online teaching
- Adjust online difficulty if want to offer online class again

Key Take-aways

An intelligent platform empowering course planning & improving

Adjust capacity for High / Low demand courses

Cross-adjust courses sharing same / opposite popularity trends

Add academic support for courses with high fail rate & complaints

Offer hybrid options / Enforce in-person mode for specific courses

Future Work

- **Continuous Data & Model Improvement:** Regularly update datasets and retrain models to enhance accuracy and robustness.
- **Instructor Impact Analysis:** Compare enrollment trends and grade distributions across different professors to identify relevant insights.
- **AI-Driven Insights:** Integrate Gemini AI & Chatbots to provide real-time course highlights and summaries.
- **Expanded User Applications:** Tailor the platform to support diverse users
 - **Professors:** Gain insights for course feedback and future improvement.
 - **Students:** Plan future course enrollments more effectively.
 - **Program Ministers:** Optimize program design based on data-driven insights.

Business Question

How can we use data to assess and improve UBC's course planning?

Business Ambition

Leverage data to shape the future of UBC education
